

mobilPT Authorization Form

Restor physical therapy has developed a new platform for delivering home exercises in the form of videos and voice instructions. These custom assignments are created for you by your therapist and will be sent to you via email. You will receive an email from mobilPT with your therapists name in the subject line and be taken to the mobilPT web site to create a password. Your user name will be your email address. Once there you will be able to view your custom home exercise video assignment.

Your assignments will be stored on mobilPT's secured server for an indefinite period of time and you can access your assignments anytime, anywhere. The mobilPT videos will play on your computer, ipad or smartphone. If you would like to utilize this service there will be a \$5 fee per transaction. The average number of transactions per condition are usually 1 to 3 assignments. If you choose this service this fee will simply be added to your co-pay or pay on account at the front desk.
